Plant Science, 66 (1990) 281 – 284
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 66 (1990)

Abscisic acid, helianthinin, gene expression, osmotic pressure, 211
Acyl-(acyl carrier protein), glycerol-3-phosphate acyltransferase, pea, chloroplast, 65
Agravitropic mutants, *Arabidopsis*, auxin sensitivity, gravitropism, 131
Aldoximes, glucosylation, glucosinolates, metabolite conjugation, sulfation, sulfate esters, sulfatoglucosides, xenobiotics, l1
Anther culture, culture medium, glucose, *Triticum aestivum*, haploid, 255
Antisense gene, transgenic tobacco, chloramphenicol acetyltransferase gene, antisense RNA, 231
Antisense RNA, transgenic tobacco, antisense gene, chloramphenicol acetyltransferase gene, 231
Apocytochrome *b* gene, plant mitochondria, mtDNA, *Triticum*, 237
Arabidopsis, auxin sensitivity, gravitropism, agravitropic mutants, 131
Armoracia rusticana, peroxidase, cell suspension, hairy root, horseradish, 271
Arundo donax leaves, isoprene emissions, grass, photorespiraton inhibitors, photosynthetic CO_2 assimilation, 139
ATPase, salinity, salt-stress, plasma membrane, 145
Auxin sensitivity, *Arabidopsis*, gravitropism, agravitropic mutants, 131

Barley, nitrite reductase, purification, characterisation, 155
Benzyladenine, cell cultures, naphthaleneacetic acid, plant regeneration, *Sideritis angustifolia*, spermidine, 113
Brassica juncea, brown mustard, cotyledon culture, regeneration, organogenesis, tissue culture, 247
Brown mustard, *Brassica juncea*, cotyledon culture, regeneration, organogenesis, tissue culture, 247

Callus, *Triticum aestivum*, peptide hydrolases, esterases and naphtylamidases, differentiation vs. dedifferentiation, wheat tissues, 51
Callus culture, *Fragaria* × *ananassa*, strawberry, tissue culture, regeneration, somaclonal variation, 119
Carbon metabolism, *Glycine max*, leaf anatomy, paraveinal mesophyll, protoplasts, ribulose 1,5-bisphosphate carboxylase, 167
Carotenoids, triazoles, maize, growth, chlorophyll, sterol biosynthesis, 21
Cell cultures, benzyladenine, naphthaleneacetic acid, plant regeneration, *Sideritis angustifolia*, spermidine, 113
Cell cultures, pyrophosphate, energy charge, 59
Cell cycle, chloramphenicol, rRNA (chloroplast and cytoplasmic), light, heterotrophic growth, rifampicin, *Scenedesmus quadricauda*, 35
Cell sap pH, leaf senescence, *Oryza sativa*, proton secretion, 29
Cell suspension, peroxidase, hairy root, horseradish, *Armoracia rusticana*, 271
Cereals, nutrient uptake, suspension cultures, measure system, tobacco, 87
Characterisation, nitrite reductase, barley, purification, 155
Chlamydomonas reinhardtii, starch synthesis, phosphorylase, starvation, 1
Chloramphenicol, cell cycle, rRNA (chloroplast and cytoplasmic), light, heterotrophic growth, rifampicin, *Scenedesmus quadricauda*, 35
Chloramphenicol acetyltransferase gene, transgenic tobacco, antisense gene, antisense RNA, 231
Chlorophyll, triazoles, maize, growth, carotenoids, sterol biosynthesis, 21
Chloroplast, acyl-(acyl carrier protein), glycerol-3-phosphate acyltransferase, pea, 65
Chlorotoluron, cytochrome *P*-450, hydroxylase, *N*-demethylase, cyometrinil, *Triticum aestivum*, 195
Cochliobolus heterostrophus, *Drechslera maydis*, phytotoxin, drechslerol-C, 3-hydroxy-eicos-11(*Z*)-enyl heptacos-11(*Z*)-enoate, *Costus speciosus*, 43
Costus speciosus, *Drechslera maydis*, *Cochliobolus heterostrophus*, phytotoxin, drechslerol-C, 3-hydroxy-eicos-11(*Z*)-enyl heptacos-11(*Z*)-enoate, 43
Cotyledon culture, *Brassica juncea*, brown mustard, regeneration, organogenesis, tissue culture, 247
Cowpea, fatty acids, 185
Culture medium, anther culture, glucose, *Triticum aestivum*, haploid, 255
Cyometrinil, cytochrome *P*-450, chlorotoluron, hydroxylase, *N*-demethylase, *Triticum aestivum*, 195
Cytochrome *P*-450, chlorotoluron, hydroxylase, *N*-demethylase, cyometrinil, *Triticum aestivum*, 195

Decapitation, systemic acquired resistance, resistance to TMV infection, membrane lipid composition, membrane fluidity, 173
N-Demethylase, cytochrome *P*-450, chlorotoluron, hydroxylase, cyometrinil, *Triticum aestivum*, 195
Developing seeds, glucosinolates, oil, erucic acid, sulphur application, 181

Differentiation vs. dedifferentiation, *Triticum aestivum*, peptide hydrolases, esterases and naphtylamidases, wheat tissues, callus, 51
Drechslera maydis, *Cochliobolus heterostrophus*, phytotoxin, drechslerol-C, 3-hydroxy-eicos-11(*Z*)-enyl heptacos-11(*Z*)-enoate, *Costus speciosus*, 43
Drechslerol-C, *Drechslera maydis*, *Cochliobolus heterostrophus*, phytotoxin, 3-hydroxy-eicos-11(*Z*)-enyl heptacos-11(*Z*)-enoate, *Costus speciosus*, 43

Embryogenic calli, maize, isozyme patterns, 127
Energy charge, pyrophosphate, cell cultures, 59
Erucic acid, sulphur application, developing seeds, glucosinolates, oil, 181
Esterase, lipid acyl hydrolase, multigene family, patatin, potato, *Solanum tuberosum*, 221
Esterases and naphtylamidases, *Triticum aestivum*, peptide hydrolases, differentiation vs. dedifferentiation, wheat tissues, callus, 51

Fatty acids, cowpea, 185
Feijoa sellowiana, somatic embryogenesis, growth regulators, tissue culture, 263
Fragaria × *ananassa*, strawberry, tissue culture, callus culture, regeneration, somaclonal variation, 119

Gene expression, helianthinin, abscisic acid, osmotic pressure, 211
Glucose, anther culture, culture medium, *Triticum aestivum*, haploid, 255
Glucosinolates, aldoximes, glucosylation, metabolite conjugation, sulfation, sulfate esters, sulfatoglucosides, xenobiotics, 11
Glucosinolates, developing seeds, oil, erucic acid, sulphur application, 181
Glucosylation, aldoximes, glucosinolates, metabolite conjugation, sulfation, sulfate esters, sulfatoglucosides, xenobiotics, 11
Glycerol-3-phosphate acyltransferase, acyl-(acyl carrier protein), pea, chloroplast, 65
Glycine max, carbon metabolism, leaf anatomy, paraveinal mesophyll, protoplasts, ribulose 1,5-bisphosphate carboxylase, 167
Grapevine, Mg-ATPase, plasmalemma, *Vitis vinifera*, 73
Grass, isoprene emissions, *Arundo donax* leaves, photorespiraton inhibitors, photosynthetic CO_2 assimilation, 139
Gravitropism, *Arabidopsis*, auxin sensitivity, agravitropic mutants, 131
Growth, triazoles, maize, chlorophyll, carotenoids, sterol biosynthesis, 21
Growth regulators, *Feijoa sellowiana*, somatic embryogenesis, tissue culture, 263

Hairy root, peroxidase, cell suspension, horseradish, *Armoracia rusticana*, 271
Haploid, anther culture, culture medium, glucose, *Triticum aestivum*, 255
Helianthinin, gene expression, abscisic acid, osmotic pressure, 211
Helminthosporium maydis, methomyl, maize mitochondria, male sterility, mitochondrial ATPase, membrane potential, 81
Heterotrophic growth, cell cycle, chloramphenicol, rRNA (chloroplast and cytoplasmic), light, rifampicin, *Scenedesmus quadricauda*, 35
Horseradish, peroxidase, cell suspension, hairy root, *Armoracia rusticana*, 271
3-Hydroxy-eicos-11(*Z*)-enyl heptacos-11(*Z*)-enoate, *Drechslera maydis*, *Cochliobolus heterostrophus*, phytotoxin, drechslerol-C, *Costus speciosus*, 43
Hydroxylase, cytochrome *P*-450, chlorotoluron, *N*-demethylase, cyometrinil, *Triticum aestivum*, 195

In vitro stress, rice, suspension cultures, nutrient uptake, 95
Isoprene emissions, *Arundo donax* leaves, grass, photorespiraton inhibitors, photosynthetic CO_2 assimilation, 139
Isozyme patterns, maize, embryogenic calli, 127

Leaf anatomy, carbon metabolism, *Glycine max*, paraveinal mesophyll, protoplasts, ribulose 1,5-bisphosphate carboxylase, 167
Leaf senescence, cell sap pH, *Oryza sativa*, proton secretion, 29
Light, cell cycle, chloramphenicol, rRNA (chloroplast and cytoplasmic), heterotrophic growth, rifampicin, *Scenedesmus quadricauda*, 35
Lipid acyl hydrolase, esterase, multigene family, patatin, potato, *Solanum tuberosum*, 221

Maize, isozyme patterns, embryogenic calli, 127
Maize, triazoles, growth, chlorophyll, carotenoids, sterol biosynthesis, 21
Maize mitochondria, *Helminthosporium maydis*, methomyl, male sterility, mitochondrial ATPase, membrane potential, 81
Male sterility, *Helminthosporium maydis*, methomyl, maize mitochondria, mitochondrial ATPase, membrane potential, 81
Measure system, nutrient uptake, suspension cultures, cereals, tobacco, 87
Membrane fluidity, systemic acquired resistance, decapitation, resistance to TMV infection, membrane lipid composition, 173
Membrane lipid composition, systemic acquired resistance, decapitation, resistance to TMV infection, membrane fluidity, 173
Membrane potential, *Helminthosporium maydis*, methomyl, maize mitochondria, male sterility, mitochondrial ATPase, 81
Metabolite conjugation, aldoximes, glucosylation, glucosinolates, sulfation, sulfate esters, sulfatoglucosides, xenobiotics, 11

Methomyl, *Helminthosporium maydis*, maize mitochondria, male sterility, mitochondrial ATPase, membrane potential, 81
Mg-ATPase, grapevine, plasmalemma, *Vitis vinifera*, 73
Mitochondrial ATPase, *Helminthosporium maydis*, methomyl, maize mitochondria, male sterility, membrane potential, 81
mtDNA, apocytochrome *b* gene, plant mitochondria, *Triticum*, 237
Multigene family, esterase, lipid acyl hydrolase, patatin, potato, *Solanum tuberosum*, 221

Naphthaleneacetic acid, benzyladenine, cell cultures, plant regeneration, *Sideritis angustifolia*, spermidine, 113
Nitrite reductase, barley, purification, characterisation, 155
Nutrient uptake, rice, suspension cultures, in vitro stress, 95
Nutrient uptake, suspension cultures, measure system, cereals, tobacco, 87

Oil, developing seeds, glucosinolates, erucic acid, sulphur application, 181
Organogenesis, *Brassica juncea*, brown mustard, cotyledon culture, regeneration, tissue culture, 247
Oryza sativa, cell sap pH, leaf senescence, proton secretion, 29
Osmotic pressure, helianthinin, gene expression, abscisic acid, 211

Paraveinal mesophyll, carbon metabolism, *Glycine max*, leaf anatomy, protoplasts, ribulose 1,5-bisphosphate carboxylase, 167
Partitioning, photosynthesis, sucrose phosphate synthase, sucrose synthesis, 205
Patatin, esterase, lipid acyl hydrolase, multigene family, potato, *Solanum tuberosum*, 221
Pea, acyl-(acyl carrier protein), glycerol-3-phosphate acyltransferase, chloroplast, 65
Peptide hydrolases, *Triticum aestivum*, esterases and naphtylamidases, differentiation vs. dedifferentiation, wheat tissues, callus, 51
Peroxidase, cell suspension, hairy root, horseradish, *Armoracia rusticana*, 271
Phosphorylase, starch synthesis, starvation, *Chlamydomonas reinhardtii*, 1
Photorespiraton inhibitors, isoprene emissions, *Arundo donax* leaves, grass, photosynthetic CO_2 assimilation, 139
Photosynthesis, partitioning, sucrose phosphate synthase, sucrose synthesis, 205
Photosynthetic CO_2 assimilation, isoprene emissions, *Arundo donax* leaves, grass, photorespiraton inhibitors, 139
Phytotoxin, *Drechslera maydis*, *Cochliobolus heterostrophus*, drechslerol-C, 3-hydroxy-eicos-11(*Z*)-enyl heptacos-11(*Z*)-enoate, *Costus speciosus*, 43
Plant mitochondria, apocytochrome *b* gene, mtDNA, *Triticum*, 237
Plant regeneration, benzyladenine, cell cultures, naphthaleneacetic acid, *Sideritis angustifolia*, spermidine, 113
Plasmalemma, grapevine, Mg-ATPase, *Vitis vinifera*, 73
Plasma membrane, salinity, salt-stress, ATPase, 145
Potato, esterase, lipid acyl hydrolase, multigene family, patatin, *Solanum tuberosum*, 221
Proton secretion, cell sap pH, leaf senescence, *Oryza sativa*, 29
Protoplasts, carbon metabolism, *Glycine max*, leaf anatomy, paraveinal mesophyll, ribulose 1,5-bisphosphate carboxylase, 167
Purification, nitrite reductase, barley, characterisation, 155
Pyrophosphate, energy charge, cell cultures, 59

Regeneration, *Brassica juncea*, brown mustard, cotyledon culture, organogenesis, tissue culture, 247
Regeneration, *Fragaria* × *ananassa*, strawberry, tissue culture, callus culture, somaclonal variation, 119
Resistance to TMV infection, systemic acquired resistance, decapitation, membrane lipid composition, membrane fluidity, 173
Ribulose 1,5-bisphosphate carboxylase, carbon metabolism, *Glycine max*, leaf anatomy, paraveinal mesophyll, protoplasts, 167
Rice, suspension cultures, nutrient uptake, in vitro stress, 95
Rifampicin, cell cycle, chloramphenicol, rRNA (chloroplast and cytoplasmic), light, heterotrophic growth, *Scenedesmus quadricauda*, 35
rRNA (chloroplast and cytoplasmic), cell cycle, chloramphenicol, light, heterotrophic growth, rifampicin, *Scenedesmus quadricauda*, 35

Salinity, salt-stress, plasma membrane, ATPase, 145
Salt-stress, salinity, plasma membrane, ATPase, 145
Scenedesmus quadricauda, cell cycle, chloramphenicol, rRNA (chloroplast and cytoplasmic), light, heterotrophic growth, rifampicin, 35
Sideritis angustifolia, benzyladenine, cell cultures, naphthaleneacetic acid, plant regeneration, spermidine, 113
Solanum tuberosum, esterase, lipid acyl hydrolase, multigene family, patatin, potato, 221
Somaclonal variation, *Fragaria* × *ananassa*, strawberry, tissue culture, callus culture, regeneration, 119
Somatic embryogenesis, *Feijoa sellowiana*, growth regulators, tissue culture, 263
Spermidine, benzyladenine, cell cultures, naphthaleneacetic acid, plant regeneration, *Sideritis angustifolia*, 113
Starch synthesis, phosphorylase, starvation, *Chlamydomonas reinhardtii*, 1
Starvation, starch synthesis, phosphorylase, *Chlamydomonas reinhardtii*, 1
Sterol biosynthesis, triazoles, maize, growth, chlorophyll, carotenoids, 21
Strawberry, *Fragaria* × *ananassa*, tissue culture, callus culture, regeneration, somaclonal variation, 119

Sucrose phosphate synthase, partitioning, photosynthesis, sucrose synthesis, 205
Sucrose synthesis, partitioning, photosynthesis, sucrose phosphate synthase, 205
Sulfate esters, aldoximes, glucosylation, glucosinolates, metabolite conjugation, sulfation, sulfatoglucosides, xenobiotics, 11
Sulfation, aldoximes, glucosylation, glucosinolates, metabolite conjugation, sulfate esters, sulfatoglucosides, xenobiotics, 11
Sulfatoglucosides, aldoximes, glucosylation, glucosinolates, metabolite conjugation, sulfation, sulfate esters, xenobiotics, 11
Sulphur application, developing seeds, glucosinolates, oil, erucic acid, 181
Suspension cultures, nutrient uptake, measure system, cereals, tobacco, 87
Suspension cultures, rice, nutrient uptake, in vitro stress, 95
Systemic acquired resistance, decapitation, resistance to TMV infection, membrane lipid composition, membrane fluidity, 173

Tissue culture, *Brassica juncea*, brown mustard, cotyledon culture, regeneration, organogenesis, 247
Tissue culture, *Feijoa sellowiana*, somatic embryogenesis, growth regulators, 263 Tissue culture, *Fragaria* × *ananassa*, strawberry, callus culture, regeneration, somaclonal variation, 119
Tobacco, nutrient uptake, suspension cultures, measure system, cereals, 87
Transgenic tobacco, antisense gene, chloramphenicol acetyltransferase gene, antisense RNA, 231
Triazoles, maize, growth, chlorophyll, carotenoids, sterol biosynthesis, 21
Triticum, apocytochrome *b* gene, plant mitochondria, mtDNA, 237
Triticum aestivum, anther culture, culture medium, glucose, haploid, 255
Triticum aestivum, cytochrome *P*-450, chlorotoluron, hydroxylase, *N*-demethylase, cyometrinil, 195
Triticum aestivum, peptide hydrolases, esterases and naphtylamidases, differentiation vs. dedifferentiation, wheat tissues, callus, 51

Vitis vinifera, grapevine, Mg-ATPase, plasmalemma, 73

Wheat tissues, *Triticum aestivum*, peptide hydrolases, esterases and naphtylamidases, differentiation vs. dedifferentiation, callus, 51

Xenobiotics, aldoximes, glucosylation, glucosinolates, metabolite conjugation, sulfation, sulfate esters, sulfatoglucosides, 11
